

S Broker offers its clients more with the Stock Monitor

Whereas the savings banks were originally almost exclusively associated with deposit and credit transactions, this has changed these days and clients interested in stock market transactions are targeted and served as a matter of course. S Broker – the online broker of the German savings bank organization – plays the leading role within the savings banks movement as a whole.

In the spring of 2007 the Wiesbaden online exchange trader (www.sbroker.de) revised its appearance. Clients and top traders now have new and exclusive functions and tools at their disposal in the sector "My Savings Bank Broker". Among the important new elements in this complete package deal is the "Aktienmonitor", staged in combination with theScreener. It analyzes the values of German and European exchange indexes as well as selected US stocks. The client can call up a risk/reward profile for each stock listed. In addition to this, investment alternatives are provided for each security quoted.

"theScreener has provided us with intensive support in the design and launch of our Stock Monitor. We have been awarded much praise from our clients for this tool."

"theScreener supplied us with outstanding support for the design and launch of our Aktienmonitor. We have been awarded much praise from our clients for this tool." As expressed by Michael Bußhaus, manager of the TopTrader line of business at S Broker AG & Co. KG.

An additional step-by-step expansion of "My Savings Bank Broker" and the "Aktienmonitor" has already been planned.
