

Expansion of our partnership with the Swiss Raiffeisen cooperative banks

Since "Raiffeisen Schweiz" started joint open cooperation with theScreener in 2005, a rapidly growing number of Raiffeisen banks have decided to adopt the independent share analysis provided by theScreener and used it with considerable satisfaction.

As a result of this success on the front line, the cooperation has now been expanded further: since the summer of this year, all 1150 branch offices of the third largest Swiss banking group enjoy access to theScreener's data via an intranet solution.

"The analyses of theScreener are a valuable supplement to the existing in-house research of our private banking partner, Vontobel, as an ideal and cost favorable solution. On account of the large number of inquiries in the front office, our mutual cooperation has now been expanded and integrated into the present information structure" the opinion recently expressed by Frank Verstraeten, responsible for financial information systems in the Raiffeisen Schweiz group.
