

*E*TRADE Now with Four Stars*

In foul weather, when visibility is zero, guidance is absolutely critical for survival. E*TRADE Germany, part of the worldwide operating online brokerage group, has been using the equity ratings and analysis of theScreeener since the beginning of this year, providing its customers with valuable support and guidance, just in time, before the fog began to descend upon the markets.

«Although the markets this year were very demanding, we could increase the number of customers and reach attractive trading volumes,» says Matthias Hach, country head of E*TRADE Germany. «theScreeener's independent stock ratings and easy to understand reviews support our customers in share trading, and in the selection of the underlying values of derivative and structured products.»

«The E*TRADE Group is one of the few real global players in online brokerage, and combines reliability and innovation like no other,» adds Andreas Lusser of theScreeener. «This is why our cooperation with E*TRADE, is particularly satisfying.»
