As the first independent Swiss enterprise with authorization to conduct both banking and securities trading, Incore Bank AG provides comprehensive banking services for other banks and securities traders.

Alongside securities trading – incl. transaction, processing, custody, money transfer and preparation of the necessary reports – operation and maintenance of the overall IT infrastructure is also part of its commitments.

“The integration of share ratings and analyses from theScreener onto our platform has provided a meaningful extension of our services offer. High value processed information is of discernible importance.

Most particularly, the correlation of the assessments with the actual client portfolios is an important factor in the context of client advisory services” comments Jack Hertach, CEO of the Incore Bank AG.

“Access to our analyses as straightforward as possible for our clients is an important aspect of our business. For this reason, the Incore Bank AG is an ideal partner from our point of view” is the opinion expressed by Andreas Lusser, CEO of theScreener Investor Services AG.

The private bank, Maerki Baumann & Co. AG is destined to be the first client to apply this module.
