Waste & Disposal Services

Analysis and Synthesis - World

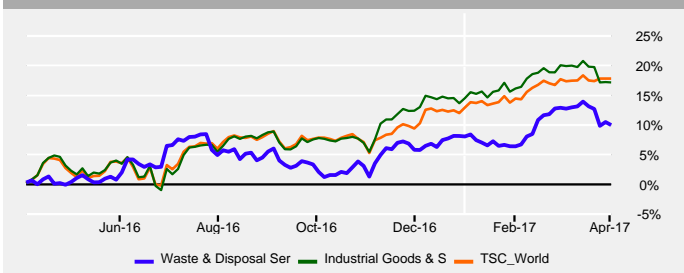

April 4, **2017**

Waste & Disposal Services (WO)

Closing price of April 4, 2017

Comparison [April 5, 2016 - April 4, 2017]

The sector Waste & Disposal Services represents less than 5% of the market capitalization of the group Industrial Goods & Services and less than 1% of the World market with 25 companies being followed regularly by the analysts.

The sector Waste & Disposal Services is currently trading close to its 52 week high and 10% above its 52 week low (bi-weekly closing).

Performance since April 5, 2016: 9.7% vs. 17.0% for the group Industrial Goods & Services and 17.6% for the TSC_World.

The current % of stocks over their Medium Term technical trend (MTT) is 40.0%.

	Market Value	Perf YtD	Nb of Stocks	Mkt Cap in \$bn	Stars	Risk Zone	G/PE Ratio	LT P/E	LT Growth	4wk Perf	% of Stocks in Uptrend
Waste & Disposal Services	128.87	1.7%	25	124.77	★★★★☆	📈	1.13	17.5	18.0%	-2.9%	40.0%
Industrial Goods & Services (I)	204.92	3.1%	955	6,466.14	★★★★☆	📈	1.15	14.4	14.2%	-2.7%	39.3%
TSC_World (WO)	264.45	5.2%	6,315	63,629.76	★★★★★	📈	1.32	16.1	18.4%	0.4%	40.5%

Price evaluation rating

In order to assess whether an index is correctly valued, we focus on Peter Lynch's broadly accepted methodology of comparing the projected earnings growth and dividend with the estimated PE ratio. Based on this approach, we feel this sector is currently strongly undervalued. A "Forecasted Growth + Estimated Dividend Yield/ Estimated Price Earnings" ratio higher than 0.9 indicates that the index's price includes a discount to growth of -20.6%.

Earnings revision trend

Compared to seven weeks ago, the analysts have raised (11.2%) their earnings estimates. This positive trend began November 15, 2016 at a price of 124.3.

"Price to Estimated Earnings" (PE) - Evolution over five years

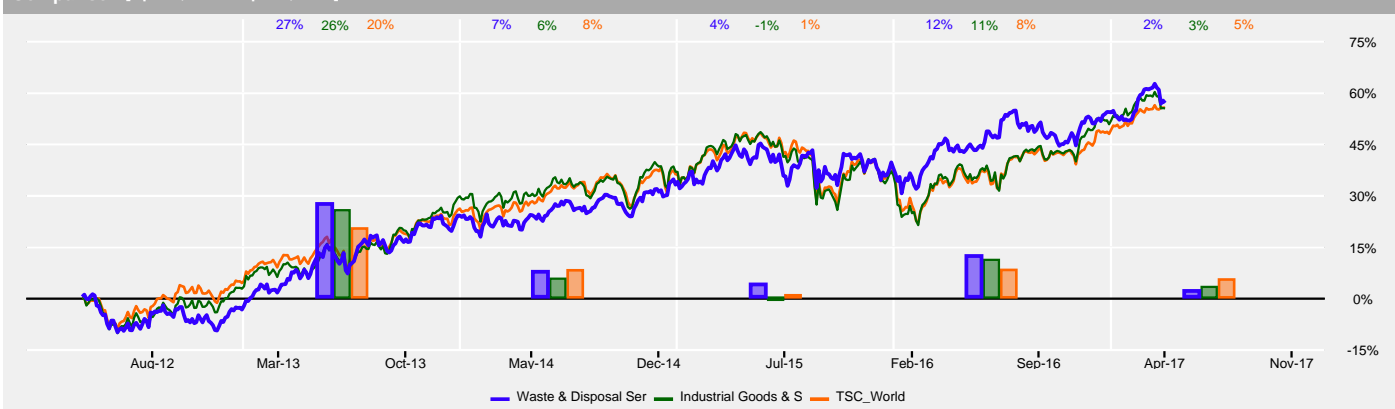

The estimated PE is calculated on the basis of the underlying stocks. While the PE of the sector Waste & Disposal Services is 17.5, the PE of the group to which it belongs (Industrial Goods & Services) is markedly lower (14.4); this indicates that the sector is trading higher than its group. Historically speaking, this sector is currently trading around its median of 17.4.

Technical trend

The index is currently at a level close to its 40-day moving average. Prior to this (since November 11, 2016), the index traded above its 40-day moving average. The confirmed Technical Reverse point (Tech Reverse - 1.75%) is currently 1% lower. Close to its average, the sector indicates a phase of indecision regarding its trend. On the other hand, with 40.0% of stocks trending positive, it would appear there is a certain weakness in the market that isn't being confirmed by the sector.

Comparison [April 4, 2012 - April 4, 2017]

Performance over 5 years

On a 5 year moving average, the performance of the sector Waste & Disposal Services is 56.6%, vs. 55.2% for the group Industrial Goods & Services and 55.4% for the TSC_World. During this period, the high of 133.5 was reached on March 2017 and the low of 73.8 in the month of June 2012.

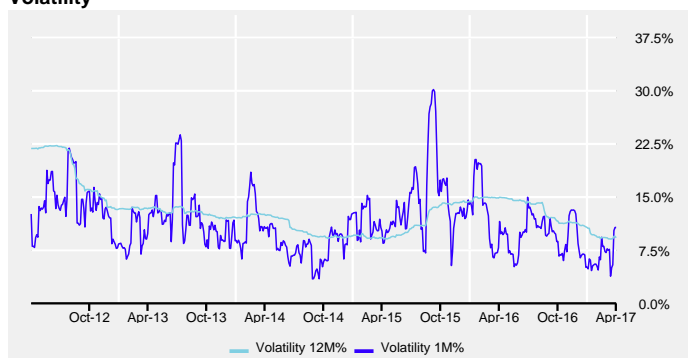

Waste & Disposal Services (WO)

Closing price of April 4, 2017

	Market Value	Perf YtD	Nb of Stocks	Mkt Cap in \$bn	Stars	Risk Zone	G/PE Ratio	LT P/E	LT Growth	4wk Perf	% of Stocks in Uptrend
Waste & Disposal Services (V)	128.87	1.7%	25	124.77	★★★★★		1.13	17.5	18.0%	-2.9%	40.0%

Volatility

The volatility is also used as a risk factor. It measures the magnitude of the high and low movements of a stock or index. The more the volatility is high, the more risky a sector is considered to be.

As of the last update, the monthly volatility of (10.6%) is lower than the last few years' average of (11.3%). The low magnitude of short term price fluctuations indicates a lull in the market.

On the other hand, long term volatility 9.2% of the sector is similar to that of the group Industrial Goods & Services (10.0%), reflecting almost identical price variations between the sector and the group to which it belongs.

The risk factor in declining markets

The "Bear Market Factor" measures the behavior of a sector in declining markets. In this context, the sector Waste & Disposal Services has a tendency to drop in the same proportion as the index TSC_World.

This behavior shows the sector can be somewhat risky during market corrections.

The risk factor in rising markets

The "Bad News Factor" measures a sector's corrections in a rising market phase.

In this configuration, the market slightly sanctions the sector Waste & Disposal Services when there is specific pressure in this particular economic activity. When the sector declines in a rising market its average deviation is -1.11%.

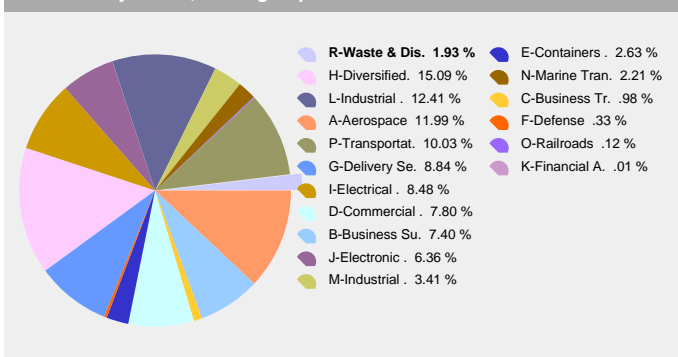

Risk analysis summary

Generally speaking, an investment in the Waste & Disposal Services sector carries an average risk because of the Bear Market factor, average risk.

Checklist (Waste & Disposal Services)

Stars	★★★★★	Strong interest since March 28, 2017.
Earnings Rev Trend		★ Analysts positive since November 15, 2016
Valuation Rating		★ Strongly undervalued

The analysis and details of the above stock can be found on page 6

Top Stocks 2017

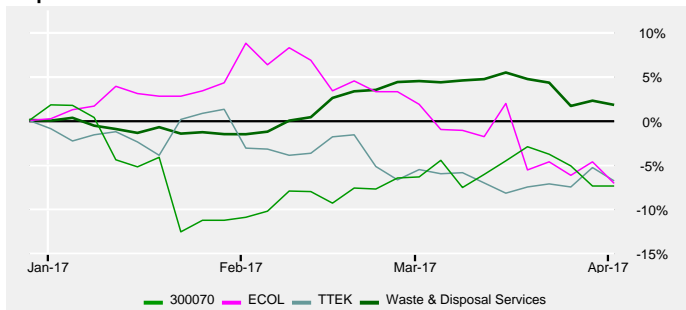

From the beginning of the year, the performance of the sector was 1.7%; as for the three best stocks, (VA TECH WABAG LTD. (VATW), CHINA EVBGHT.INTL.LTD. (257) and CITIC ENVIROTECH LTD. (CEL)), their performance was 46.8%, 20.1% and 19.6% respectively.

Top Stocks 12 months

Since 12 months ago, the performance of the sector has been 9.7%; the three best stocks, (CLEANAWAY WASTE MAN.LTD. (TPI), WASTE CONNECTIONS INCO. (WCM) and TETRA TECH INCO. (TTEK)) recorded a performances of 62.2%, 43.9% and 37.0% respectively.

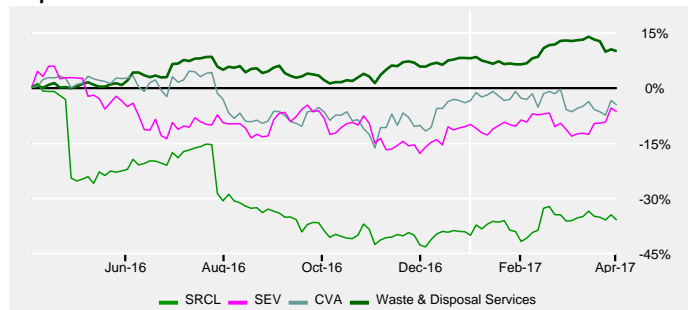

Flop Stocks 2017

BEJ.ORIGINWATER TECH. (300070), US ECOLOGY INCO. (ECOL) and TETRA TECH INCO. (TTEK) with -7.4%, -7.1% and -6.8% recorded the three worst performances from the beginning of the year. For the sector Waste & Disposal Services, the variation was 1.7%.

Only companies with a market capitalization exceeding \$500 million are mentioned.

Flop Stocks 12 months

The three worst performances in 12 months were recorded by STERICYCLE INCO. (SRCL), SUEZ CO. (SEV) and COVANTA HOLDING CORP. (CVA) with -36.1%, -6.6% and -4.8%. As for the sector Waste & Disposal Services, it recorded a variation of 9.7%.

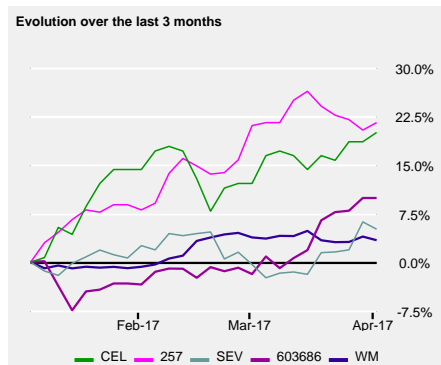

Waste & Disposal Services (WO)

Closing price of April 4, 2017

Stocks with the best valuations

Symbol Market	Name Sector	Price Ccy	Mkt Cap in \$bn	7wk EPS Rev	Stars	Risk Zone	Global Evaluation
CEL SG	CITIC ENVIROTECH LTD. Waste & Disposal Services	0.84 SGD	1.35	0.0%	★★★★★	🟡	📈
257 HK	CHINA EVBGH.T.INTL.LTD. Waste & Disposal Services	10.56 HKD	6.09	47.1%	★★★★★	🟡	📈
SEV FR	SUEZ CO. Waste & Disposal Services	14.65 EUR	8.84	19.9%	★★★★★	🟡	📈
603686 CN	FJN.LONGMA ENV.SNTN.EQU. Waste & Disposal Services	34.84 CNY	1.38	17.6%	★★★★★	🟡	📈
WM US	WASTE MANAGEMENT INCO. Waste & Disposal Services	72.53 USD	32.04	9.0%	★★★★★	🟡	📈

The global rating (Global Evaluation) is a multi-criteria approach that identifies the stocks with the best evaluations. This assessment is the compilation of fundamental (PE, growth, earnings revisions, dividend, etc.), technical (moving average, relative performance), and risk (behavior in declining markets and sensitivity to bad news) factors. In order to present the best selection, only companies with a market capitalization greater than \$1bn and showing good earnings growth valuations, are listed. Furthermore, the eligible stocks must have a minimum rating of two stars; a neutral to positive valuation; a weak to average risk zone. When the global rankings are identical, the analysts' 7 week earnings per share revision (7 wk EPS rev) acts as the deciding classification element.

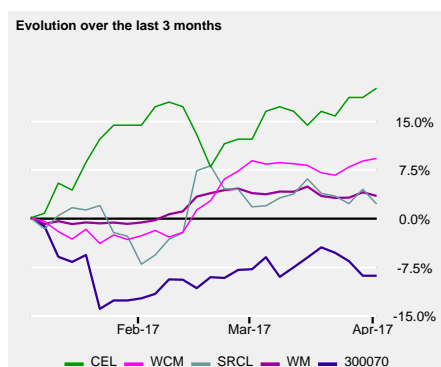

The best defensive stocks

Symbol Market	Name Sector	Price Ccy	Mkt Cap in \$bn	Bear Mkt Factor	Stars	Risk Zone	Global Evaluation
WCM CA	WASTE CONNECTIONS INCO. Waste & Disposal Services	117.84 CAD	15.42	-78	★★★★★	🟡	📈
CEL SG	CITIC ENVIROTECH LTD. Waste & Disposal Services	0.84 SGD	1.35	-60	★★★★★	🟡	📈
WM US	WASTE MANAGEMENT INCO. Waste & Disposal Services	72.53 USD	32.04	-55	★★★★★	🟡	📈
RSG US	REPUBLIC SVS.INCO. Waste & Disposal Services	62.61 USD	21.24	-44	★★★★★	🟡	📈
TPI AU	CLEANAWAY WASTE MAN.LTD. Waste & Disposal Services	1.20 AUD	1.44	-23	★★★★★	🟡	📈

The risk evaluation is based on essentially two criteria: the stock's "behavior in declining markets" (Bear Market Factor), and the stock's "sensitivity to bad news" (Bad News Factor). By positioning a stock according to the world averages, three risk levels can be attributed (weak, average, high). Combining these elements makes it possible to create a final ranking of the best defensive stocks in the market. To present the best selection, only companies with a market capitalization greater than \$1bn and showing good earnings growth valuations are listed. Furthermore, the eligible stocks must have a minimum rating of two stars; a neutral to positive valuation; a weak to average risk zone. In case of a tie, the stock's "behavior in declining markets" will act as the deciding classification element.

The stocks with the lowest correlations

Symbol Market	Name Sector	Price Ccy	Mkt Cap in \$bn	Correlation	Stars	Risk Zone	Global Evaluation
CEL SG	CITIC ENVIROTECH LTD. Waste & Disposal Services	0.84 SGD	1.35	-0.02	★★★★★	🟡	📈
WCM CA	WASTE CONNECTIONS INCO. Waste & Disposal Services	117.84 CAD	15.42	0.12	★★★★★	🟡	📈
SRCL US	STERICYCLE INCO. Waste & Disposal Services	81.07 USD	6.91	0.35	★★★★★	🟡	📈
WM US	WASTE MANAGEMENT INCO. Waste & Disposal Services	72.53 USD	32.04	0.36	★★★★★	🟡	📈
300070 CN	BEJ.ORIGINWATER TECH. Waste & Disposal Services	16.22 CNY	7.35	0.37	★★★★★	🟡	📈

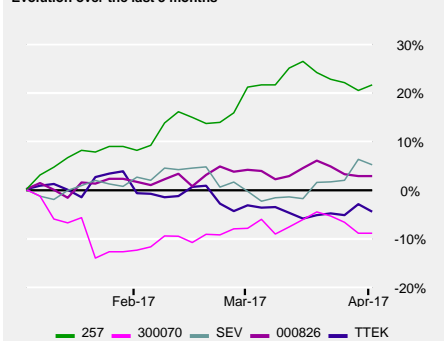

The correlation coefficient permits to identify the stocks of which the dependence on the market is the weakest. If this value is very low, less than 0.5, it signifies that less than 50% of the movements of the stock are explained by the movement of the market. On the contrary, a number close to 1 indicates that the value is very close to the evolutions of the market. In order to present the best selection, only the societies with a market capitalization higher than \$1bn and showing good earnings growth valuations are listed. Furthermore, the eligible stocks must have a minimum rating of two stars; a neutral to positive valuation; a weak to average risk zone; and a minimum correlation of 0.66. In the case of a tie in the ranking, the stock's "behavior in declining markets" (Bear Market Factor) acts as the deciding classification element.

Waste & Disposal Services (WO)

Closing price of April 4, 2017

Evolution over the last 3 months

The stocks with the weakest PE

Symbol Market	Name Sector	Price Ccy	Mkt Cap in \$bn	LT P/E	Stars	Risk Zone	Global Evaluation
257 HK	CHINA EVBGHT.INTL.LTD. Waste & Disposal Services	10.56 HKD	6.09	8.6	★★★★★	🟡	📈
300070 CN	BEJ.ORIGINWATER TECH. Waste & Disposal Services	16.22 CNY	7.35	11.9	★★★★★	🟡	📈
SEV FR	SUEZ CO. Waste & Disposal Services	14.65 EUR	8.84	12.5	★★★★★	🟡	📈
000826 CN	TUS-SOUND ENV.RES.CTD. Waste & Disposal Services	34.30 CNY	4.25	16.1	★★★★★	🟡	📈
TTEK US	TETRA TECH INCO. Waste & Disposal Services	40.20 USD	2.30	16.1	★★★★★	🟡	📈

The price to earnings ratio (PE) helps to find undervalued stocks. It is commonly accepted that if the PE of a stock is lower than the PE of its reference market, the stock has upside price potential. In order to present the best selection, only companies with a market capitalization greater than \$1bn and showing good earnings growth valuations are listed. Furthermore, the eligible stocks must have: a minimum rating of two stars, a neutral to positive valuation, a risk zone weak to average. When the PE ratios are identical, the analysts' 7 week earnings per share revision (7 wk EPS rev) acts as the deciding classification element.

Number of Stocks

The number of stocks in the index that can be analyzed.

Mkt Cap in \$bn

This number represents the Market Capitalization in USD bn. It is calculated by multiplying a firm's share price by the number of outstanding shares. For reasons of comparison, all results are in USD.

Valuation Rating

Our Valuation Rating indicates if a stock is "expensive" or "cheap" relative to its growth potential. This is used to determine whether or not the investor is paying a premium for anticipated growth.

To estimate a stock's value relative to its current price, our Valuation Rating combines:

- stock price
- projected earnings
- projected earnings growth
- dividends

We establish our rating by combining these elements.

There are five ratings, ranging from strongly undervalued 🟢🟢 to strongly overvalued 🟡🔴.

Stars

theScreener.com's star rating system is designed to enable you to identify high-quality stocks quickly and easily.

In this easy-to-use rating system, stars are earned for each element specified below:

- Earnings Rev Trend 🟢 = ★★★★★
- Valuation Rating 🟢, 🟢🟢, 🟢🟢🟢 = ★★★★★
- MT Tech Trend 🟢 = ★★★★★
- 4 week Relative Performance > 1% = ★★★★★

Therefore, a stock can earn a maximum of four stars.

The lowest rating a stock can have is no stars.

Once a stock has earned a star, it will keep it until:

- Earnings Rev Trend becomes negative 🟡
- Valuation Rating becomes negative 🟡, 🟡🔴, 🟡🔴🔴
- MT Tech Trend becomes negative 🟡
- 4 week Relative Performance drops below -1% (<-1%)

Div

This is the dividend in % for the next 12 months.

Even if the same number is shown, the dividend value can appear in one of four colors, depending on the earnings coverage:

- 0%, no dividend
- 4%, the dividends are covered (between 0% and 40% of earnings)
- 4%, the dividends represent between 40% and 70% of earnings
- 4%, the dividends are higher than 70% of earnings, which implies that the dividend coverage is not guaranteed.

Earnings Rev. Trend

The symbol 🟢 shows that compared with their earnings revisions of seven weeks ago, the analysts have now raised their estimates (7wk EPS Rev; > 1%); the symbol 🟡 indicates that compared with their earnings revisions of seven weeks ago, the analysts have now lowered their estimates (7wk EPS Rev < -1%).

When the earnings revisions (7wk EPS Rev) fall between +1% and -1%, the trend is considered to be neutral 🟢.

The symbol 🟢 indicates that the last significant revisions have been trending positive.

The symbol 🟡 indicates that the last significant revisions have been negative.

7wk EPS Rev

This is an abbreviation for 7 week Earnings Per Share Revision. This column indicates the value of these revised earnings. A figure of 2.8 signifies that compared with seven weeks ago, the analysts have now revised and raised their estimates by 2.8%. On the contrary, a negative number means that the earnings would have been revised lower.

G/PE Ratio

In order to establish our Valuation Rating, we calculate the estimated growth of future earnings (LT Growth) plus dividend in %, divided by the estimated future PE ratio (Long Term P/E).

LT PE

This is the relationship between the price (P) and the estimated long-term future earnings (E LT).

LT Growth

This is the estimated annual growth rate of future earnings, normally projected over the next two to three years.

MT Tech Trend

The MT Tech Trend indicates the current trend, positive 🟢 or negative 🟡, and the Tech Reverse indicates up to which price this trend will remain valid.

When a price falls to 1.75% above or below the Tech Reverse, the MT Tech Trend is considered neutral 🟢.

Once the price breaks out of the +1.75% neutral zone, the MT Tech Trend will change to positive.

The symbol 🟢 indicates that the previous MT Tech Trend was positive.

The symbol 🟡 indicates that the previous MT Tech Trend was negative.

4wk (Rel) Perf.

This figure measures the performance of a stock relative to its national or regional index (compared to four weeks ago). As for an Index, it measures the net performance over 4 weeks.

Bad News Factor

To determine the "Bad News Factor" we analyze a stock's declines in rising markets. In this purely objective analysis, the actual reasons for a stock's behavior are not important. If a stock price falls while its relative index goes up, it can be assumed that the stock's performance has been affected by bad news - hence the name, "Bad News Factor".

Here a stock's movements are measured on a bi-weekly basis, during a sliding 52 week period. Every time a stock drops while its reference index rises, the difference is calculated in %, integrated into a yearly average and expressed in basis points.

The higher the "Bad News Factor," the more a stock has proven to be sensitive to bad news. The lower the "Bad News Factor," the less the stock has proven to be sensitive to bad news.

Bear Market Factor

To determine the "Bear Market Factor" we analyze a stock's price movements in declining markets.

This is the analysis of the movements, in a bi-weekly intervals, during a sliding 52 week period.

The higher the "Bear Market Factor," the greater the probability a stock would drop when its relative index drops.

A "Bear Market Factor" that is strongly negative means the stock has been more resistant to losses in declining markets.

Risk Zone

The price developments of stocks are generally volatile and contain high risks that can result in a total loss. Based on a their historical behavior, stocks are classified by risk levels. These risk levels have to be considered solely in relative historic comparison to other stocks. Please note that even "Low Risk" stocks are equities and therefore high risk investments that can lose up to all of their value, and that based on the past no firm conclusions can be taken into the future.

Risk zones are determined by measuring the "Bear Market Factor" and the "Bad News Factor" against a world reference.

There are three types of risk ratings:

- Low Risk: The risk indicators fall below the world reference average.
- Medium Risk: The risk indicators are situated higher than the world reference average, but lower than one standard deviation.
- High Risk: The risk indicators are at levels higher than one standard deviation.

Volatility 12 M

Volatility is also used as a risk factor. It measures the magnitude of the high and low movements of a stock or index. The higher the volatility, the more risky a stock is considered to be.

% of Stocks in Uptrend

This is the percentage of stocks in a given list that have a positive Medium Term Technical Trend. If, for example, the aggregate of Technology / World, (which is made up of 458 stocks) has 8% "of stocks in Uptrend," it means that 38 of the stocks within that aggregate have a positive Medium Term Technical Trend.

Beta

Beta is often used as a measure of risk. Where a Beta is greater than 100, the stock is more volatile than its reference index and therefore more risky.

Correlation

Correlation is the degree of similarity (in %) in which a stock fluctuates in relation to its reference index.
